

GEETHANJALI INSTITUTE OF SCIENCE & TECHNOLOGY
(AN AUTONOMOUS INSTITUTION)
(Approved by AICTE, New Delhi & Affiliated to JNTUA, Ananthapuramu)
(Accredited by NAAC with “A” Grade, NBA (EEE,ECE&ME) & ISO9001:2008 Certified Institution)

QUESTIONBANK(DESCRIPTIVE)

Subject Name with Code: Total Quality Management -23A0334Td

Course & Branch: IV Year B.Tech (CSE / CSE-AIML / CSE-CS / CSE-DS / CE / EEE / ECE)

Regulation: RG23

UNIT - I

S.No	Question	[BT Level] [CO][Marks]
2 Marks Questions (Short)		
1.	Define quality.	[L2],[CO1],[2]
2.	List any five dimensions of quality.	L2,[CO1],[2]
3.	Define Total Quality Management.	L2,[CO1],[2]
4.	What is quality planning?	L2,[CO1],[2]
5.	State the categories of quality costs.	L2,[CO1],[2]
6.	What is prevention cost? Give an example.	L3,[CO1],[2]
7.	What is appraisal cost? Give an example.	L3,[CO1],[2]
8.	Differentiate internal failure cost and external failure cost.	L3,[CO1],[2]
9.	Mention any two techniques used for quality cost analysis.	L2,[CO1],[2]
10	List the basic concepts of Total Quality Management.	L2,[CO1],[2]
Descriptive Questions (Long)		
1.	Define quality and explain its various dimensions with suitable examples from a manufacturing and a service industry.	[L2] [CO][10M]
2.	Explain the concept of Total Quality Management (TQM) and describe how it differs from traditional quality control approaches.	L2, [CO][10M]
3.	Discuss the basic concepts and principles on which Total Quality Management is built.	L2, [CO][10M]
4.	Explain the process of quality planning and describe the steps involved in developing a quality plan for an organization.	L3, [CO][10M]
5.	Analyze the classification of quality costs into prevention, appraisal, internal failure and external failure costs with examples.	L3, [CO][10M]
6.	Construct a cost-of-quality analysis model to optimize defect reduction in an automotive manufacturing assembly line.	L3, [CO][10M]
7.	Explain various techniques used for quality cost analysis and their significance in decision making.	L2, [CO][10M]
8.	Describe the eight dimensions of quality proposed by Garvin and illustrate each with a product example.	L2, [CO][10M]
9.	Discuss how a manufacturing organization can L3 the concept of Total Quality	L3, [CO][10M]

	Management to reduce the cost of poor quality.	
10	Explain the relationship between quality costs and quality improvement, and analyze how reducing failure costs impacts overall profitability.	L3, [CO][10M]

UNIT - II

S.No	Question	[BT Level] [CO][Marks]
2 Marks Questions (Short)		
1.	What is a quality council?	L2,[CO2][2M]
2.	Define quality policy.	L2,[CO2][2M]
3.	What is strategic planning?	L2,[CO2][2M]
4.	List any four of Deming's 14 points.	L2,[CO2][2M]
5.	Mention any two barriers to TQM implementation.	L3,[CO2][2M]
6.	Mention any three benefits of TQM.	L2,[CO2][2M]
7.	List any three characteristics of a successful quality leader.	L2,[CO2][2M]
8.	Name any three gurus of quality management.	L2,[CO2][2M]
9.	Mention Crosby's four absolutes of quality.	L2,[CO2][2M]
10.	What is Juran's contribution to quality management known as?	L2,[CO2][2M]
Descriptive Questions (Long)		
1.	Explain the role and functions of a quality council in successful implementation of TQM in an organization.	[L3][CO2][10M]
2.	Discuss the significance of quality statements such as vision, mission and quality policy with suitable examples.	[L3][CO2][10M]
3.	Explain the strategic planning process for quality and describe the steps involved in developing a strategic quality plan.	[L3][CO2][10M]
4.	Describe Deming's philosophy of quality management and explain his 14 points for management.	[L3][CO2][10M]
5.	Discuss the various barriers faced by organizations while implementing TQM and suggest ways to overcome them.	[L3][CO2][10M]
6.	Explain the benefits of TQM implementation to an organization, its employees and its customers.	[L2][CO2][5M]
7.	Describe the characteristics of a successful quality leader and explain the role of leadership in TQM.	[L2][CO2][5M] [L3][CO2][10M]
8.	Compare and contrast the philosophies of Deming, Juran and Crosby as gurus of	[L3][CO2][10M]

	quality management.	
9.	Explain Crosby's absolutes of quality management and his fourteen steps for quality improvement.	[L3][CO2][10M]
10	Develop a strategic plan for implementing TQM in a mid-sized manufacturing organization, addressing likely barriers to implementation.	[L2][CO2][10M]

UNIT - III

S.No	Question	[BT Level] [CO][Marks]
2 Marks Questions (Short)		
1.	Define customer satisfaction.	L2,[CO3][2M]
2.	What is customer perception of quality?	L2,[CO3][2M]
3.	List any two methods of handling customer complaints.	L2,[CO3][2M]
4.	Define service quality.	L2,[CO3][2M]
5.	What is customer retention?	L2,[CO3][2M]
6.	What is employee empowerment?	L2,[CO3][2M]
7.	State the three processes of the Juran Trilogy.	L2,[CO3][2M]
8.	Expand PDSA and state its four stages.	L2,[CO3][2M]
9.	Define Kaizen.	L2,[CO3][2M]
10	What is supplier rating?	L3,[CO3][2M]
Descriptive Questions (Long)		
1.	Explain the concept of customer satisfaction and discuss the factors that influence customer perception of quality.	L2,[CO3][10M]
2.	Discuss the various methods used by organizations to handle customer complaints effectively.	L3,[CO3][10M]
3.	Explain the concept of service quality and describe its dimensions with suitable examples.	L2,[CO3][10M]
4.	Discuss the strategies adopted by organizations to achieve customer retention.	L3,[CO3][10M]
5.	Explain the importance of employee involvement and motivation in achieving total quality.	L2,[CO3][10M]
6.	Describe the concept of empowerment teams and explain how empowerment contributes to continuous process improvement.	L2,[CO3][10M]
7.	Explain the Juran Trilogy and discuss its application in continuous process	L3,[CO3][10M]

	improvement.	
8.	Describe the PDSA (Plan-Do-Study-Act) cycle and explain how it is applied for continuous process improvement, with reference to Kaizen.	L3,[CO3][10M]
9.	Develop a PDSA-based quality improvement plan to enhance process efficiency in a pharmaceutical production facility.	L3,[CO3][10M]
10	Explain the concept of supplier partnership and discuss the process of supplier selection, sourcing and supplier rating.	L2,[CO3][10M]

UNIT - IV

S.No	Question	[BT Level] [CO][Marks]
2 Marks Questions (Short)		
1.	Define benchmarking.	L2,[CO4][2M]
2.	List any two reasons to benchmark.	L2,[CO4][2M]
3.	What is QFD?	L2,[CO4][2M]
4.	Define House of Quality.	L2,[CO4][2M]
5.	State the Taguchi Quality Loss Function concept in brief.	L2,[CO4][2M]
6.	Expand TPM and state its objective.	L2,[CO4][2M]
7.	Expand FMEA and list its stages.	L2,[CO4][2M]
8.	List any four of the seven tools of quality.	L2,[CO4][2M]
9.	Define process capability.	L2,[CO4][2M]
10	What is Six Sigma?	L2,[CO4][2M]
Descriptive Questions (Long)		
1.	Explain the concept of benchmarking, its reasons and describe the steps involved in the benchmarking process.	L2,[CO4][10M]
2.	Utilize benchmarking methods to evaluate supplier performance in the electronics supply chain industry.	L3,[CO4][10M]
3.	Explain Quality Function Deployment (QFD) and describe the construction of the House of Quality with a suitable example.	L3,[CO4][10M]
4.	Discuss the QFD process and explain the benefits of implementing QFD in product design and development.	L2,[CO4][10M]
5.	Explain the Taguchi Quality Loss Function and experiment with its modeling to	L3,[CO4][10M]

	boost design robustness of automotive suspension systems.	
6.	Explain the concept of Total Productive Maintenance (TPM), its objectives and the areas that require improvement for effective TPM implementation.	L2,[CO4][10M]
7.	Solve an FMEA-based risk assessment scenario to prioritize maintenance actions in a power generation plant, explaining the stages of FMEA.	L3,[CO4][10M]
8.	Describe the seven tools of quality and explain how each tool is applied in quality control with examples.	L2,[CO4][10M]
9.	Explain the concept of process capability and discuss how process capability indices are used to assess process performance.	L3,[CO4][10M]
10	Explain the concept of Six Sigma and describe the New Seven Management tools used for quality planning and analysis.	L2,[CO4][10M]

UNIT - V

S.No	Question	[BT Level] [CO][Marks]
2 Marks Questions (Short)		
1.	What is ISO 9000?	L2,[CO5][2M]
2.	State the need for quality systems.	L2,[CO5][2M]
3.	List any four elements of ISO 9000:2000.	L2,[CO5][2M]
4.	What is quality documentation?	L2,[CO5][2M]
5.	Define quality auditing.	L2,[CO5][2M]
6.	What is QS 9000?	L2,[CO5][2M]
7.	Define ISO 14000.	L2,[CO5][2M]
8.	List the steps in implementation of a quality system.	L3,[CO5][2M]
9.	State any two benefits of ISO 14000 certification.	L2,[CO5][2M]
10	Differentiate internal audit and external audit.	L3,[CO5][2M]
Descriptive Questions (Long)		
1.	Explain the need for ISO 9000 and other quality systems in modern organizations.	L2,[CO5][10M]
2.	Describe the elements of ISO 9000:2000 quality system and their significance.	L2,[CO5][10M]
3.	Select and implement ISO 9001 documentation protocols for standardized quality management in aerospace component fabrication.	L3,[CO5][10M]
4.	Explain the steps involved in the implementation of a quality management	L3,[CO5][10M]

	system in an organization.	
5.	Discuss the importance of documentation in a quality management system and describe the hierarchy of quality documents.	L2,[CO5][10M]
6.	Explain the concept of quality auditing, its types and the process of conducting a quality audit.	L3,[CO5][10M]
7.	Discuss the concept, requirements and benefits of QS 9000 for the automotive industry.	L2,[CO5][10M]
8.	Explain the concept, requirements and benefits of ISO 14000 environmental management system.	L2,[CO5][10M]
9.	Compare ISO 9000, QS 9000 and ISO 14000 quality systems highlighting their scope and applications.	L3,[CO5][10M]
10	Discuss a case study on implementation of ISO 9001 quality management system in a manufacturing organization and analyze the benefits achieved.	L3,[CO5][10M]
